

# PRANAY SURENDRAKUMAR

Senior .NET Developer | Backend Engineer

Email: pranay.kumar9888@gmail.com | Phone: +91-8793866850 | Location: Nagpur, India

## PROFESSIONAL SUMMARY

Senior .NET Backend Engineer with 9+ years of experience designing and building scalable, high-performance applications using C#, ASP.NET Core, and SQL Server. Strong expertise in system design, REST API development, and performance optimization, with proven success in reducing latency and handling high-concurrency workloads. Experienced in architecting multitenant SaaS platforms, improving system reliability, and leading development teams to deliver scalable, high-impact solutions.

## KEY ACHIEVEMENTS

- Reduced application latency by ~40% through SQL query optimization, indexing, and execution plan analysis
- Improved development efficiency by introducing reusable components and modular architecture, reducing feature delivery time by ~30% by minimizing code duplication and improving reusability
- Led and mentored a team of developers, improving code quality, reducing production defects and ensuring timely delivery of enterprise solutions

## TECHNICAL SKILLS

### Languages:

C#, JavaScript, TypeScript, SQL

### Backend:

ASP.NET Core, ASP.NET MVC, Web API, Entity Framework Core, LINQ, ADO.NET, Third-Party API Integration (Payment Gateways, External Services)

### Frontend:

Angular, HTML5, CSS3, Bootstrap, Angular Material

### Database:

SQL Server, Query Optimization, Indexing, Performance Tuning

### Architecture & Design:

N-Tier Architecture, REST API Design, SOLID Principles, Design Patterns, System Design, Scalability, High Availability, Concurrency Handling, Asynchronous Programming

### Security & Authentication:

JWT Authentication, OAuth 2.0, Role-Based Authorization

### Cloud & DevOps:

Azure (Basic), IIS (Application Deployment & Hosting), CI/CD Pipelines (GitHub Actions – build & deployment automation)

### Tools:

Visual Studio, SSMS, VS Code, Git, Postman

## CERTIFICATIONS & LEARNING

- Microsoft Azure Fundamentals (AZ-900) – Completed training (Udemy, 2026)
- Microservices Architecture – Hands-on learning with .NET (service communication, API design)

## PROFESSIONAL EXPERIENCE

### Senior Software Developer – Capp Systems (2020 – Present)

- Designed multitenant SaaS architecture supporting multiple vendors with tenant-level data isolation
- Reduced application latency by ~40% through SQL optimization and indexing
- Developed secure REST APIs and integrated third-party payment gateway APIs with validation and error handling
- Improved performance for high-concurrency workloads and increased development efficiency by ~30% through modular architecture
- Led a team, conducted code reviews, and improved code quality with 65% unit test coverage

### Senior Software Developer – Vishwa Technologies (2019 – 2020)

- Developed scalable web applications using ASP.NET MVC and SQL Server
- Integrated third-party APIs including payment gateways and implemented real-time communication using SignalR
- Optimized database performance through query tuning and indexing
- Designed secure authentication and authorization mechanisms

### Software Developer – Stepone Technologies (2016 – 2019)

- Developed Windows and Android applications for hardware monitoring
- Built internal tools to support operational workflows and reporting
- Processed hardware data for analysis and improved reliability through unit testing

## KEY PROJECTS

### Multitenant E-Commerce Platform (SaaS)

- Designed scalable shared-database multitenant architecture supporting multiple vendors and concurrent users
- Implemented subscription-based access model with tenant-level data isolation
- Optimized system performance for high-volume transactional workloads

### CDNA Resource Monitoring System

- Built scalable resource monitoring system using ASP.NET Web API and Angular
- Developed REST APIs and dashboards for real-time tracking and analysis

### Electronic Document Management System (EDMS)

- Designed workflow-based document approval system with secure lifecycle management
- Improved process efficiency through structured document tracking

### Hardware Monitoring & Reporting Application

- Developed system to process and analyze hardware-generated data
- Enabled accurate reporting and monitoring through optimized backend services

## EDUCATION

M.Sc (Electronics) – RTM Nagpur University

PGDCSA – RTM Nagpur University
